Other Projects -:

○ **Flutter**

I am very interested in mobile development. I learn flutter in my free time and develop personal android application using flutter. So, I am sure I can contribute in professional flutter application development.

My personal projects :-

- **Task Planner**

Android App (Flutter)

This is a task planner android application using Flutter. User can schedule tasks in advance and you will be notified when the time for the task is approaching.

Technology:

- sqflite, getx, get_storage

- **Crypto**

Android App (Flutter)

This app is cryptocurrency application developed by using flutter. In this app, you can see information about crypto coins and cryptocurrency price and exchanges. The data will be updated every second. You can see latest cryptocurrency price and information.

Technology:

- getx, get_storage
- API : <https://www.coingecko.com>

- **Tractor Rental Service**

Android App (Flutter)

This application was developed for farmer. User can record rental history and remember to get rental fee. This application supports multi languages (Eng,Mya). In this app, I'm using firestore for data storage and it make to sync data between users such as owner, driver and who collect rental fee.

Technology:

- getx, get_storage, firebase
